Largo offers three fat oscillators, two of them with sub oscillators These oscillators include models of classic analog waveforms as well as a selection of waves from the PPG and Waldorf Wave stored in two Wavetables.. All these run through two Waldorf multimode filters with steep cutoff, resonance up to self-oscillation and a drive stage to add even more punch and grainyness to the sound.. Ultra-fast envelope generators and flexible LFOs as well as an easy to understand, yet extremely versatile modulation matrix make for a sound designer's dream.
